• **MultiTouch !**

• **Wireless !**

Features:

- Large touch surface

The large, 5-inch touchpad offers you more room to point, scroll and swipe just where you want it.

- Clutter-free wireless device

Browsing has never been so convenient. Just put the touchpad down and let your fingertips guide you to your favorite websites.

- Logitech Unifying receiver

The tiny receiver stays in your laptop. Plus, you can easily add a compatible wireless mouse, keyboard or number pad—without the hassle of multiple USB receivers.

- Advanced 2.4 GHz wireless

Now you can work or play in more places with long-range wireless connection that virtually eliminates delays, dropouts and interference and gives you a range of up to 25 meters (82 feet).

- Fewer battery hassles

A 4-month battery life means you can go for months without the hassle of changing batteries. And an LED indicator tells you when the touchpad is on and your batteries are running low.

Functions:

- One-finger control

Touch one finger anywhere on the touchpad to control your cursor. Want to click on a link? Just tap and go.

- Two-finger scrolling

Scroll up or down with two fingers to easily move through a document or your favorite web page—like your list of friends on your Facebook® page.

- Three-finger swipe

A simple, three-finger horizontal swipe moves you back and forth so you can flip through your wedding photos or move from your Amazon® wish list to your Gmail™ account in a flash. With a three-finger vertical swipe, you can easily move page-up or page-down.

- Four-finger swipe

Use a four-finger swipe to switch between your favorite applications. Jump from Internet Explorer® to Skype™ with just a swipe.

System requirements:

- Windows® 7
- USB-input

Scope of supply:

- Wireless Touchpad
- Unifying-receiver
- 2 batteries (type AA)
- manual
