Fully working, manufacturer recertified genuine device.
1 year warranty

Perfectly designed to fit snugly under your palm, the ergonomic shape of the Razer DeathAdder Chroma gives gamers the most comfortable gaming experience ever, especially during the most testing of battles The Razer DeathAdder Chroma is equipped with a 10,000dpi optical sensor. It is capable of mouse movement speeds of up to 200 inches per second and 50g accelerations.

Whether your playing at fast or low speeds, the Deathadder Chroma will always respond onscreen with exacting accuracy and the organic fluidity only possible with an optical sensor.

The Razer DeathAdder Chroma's sensor is also capable of tracking Z-axis to as low as 1mm on most surfaces including glass table tops. This is perfect for low-sense gamers who want to set tracking to cut-off as soon as they lift their mice.

Chroma lighting with 16.8 million customizable color options Whether you're in the mood for electric blue, pastel pink, or signature Razer green, you can now illuminate your Razer DeathAdder Chroma's scroll wheel and Razer logo just the way you want
